

Fairview Independent School District

SB 1 Required Operations Plan for the 21/22 School Year
September 18, 2021

As a team, we will be difference makers in the lives of our students by giving each child our best in everything we do.

Fairview Independent is committed to the overall health and safety of our students and families. The goal of the Fairview Independent School District is to prioritize in-person learning for all students in the safest manner possible.

Senate Bill 1 was passed on September 9, 2021 during a Special Session. Senate Bill 1 requires all public school districts in the state of Kentucky to develop a COVID-19 Operations Plan. The Fairview Independent School District has carefully planned operations since the start of the pandemic. This document includes the strategies specific to this requirement.

- Promoting vaccination is one of the recommendations within the guidance document. We will work with local partners to offer vaccinations to those that are interested either onsite or at convenient locations within the community.
- Per the Guidance from the Kentucky Department of Public Health and the CDC, masking is required in all indoor settings as well as on buses.
- We continue to require parents/guardians to monitor their children for fever or other symptoms of COVID-19 and keep students at home if they are displaying any symptoms.
- We continue to require staff to monitor themselves for symptoms of COVID-19 and stay home if they are displaying any of those symptoms.
- We continue to promote physical distancing.
- We continue to reinforce and teach, where necessary, handwashing and respiratory etiquette such as coughing into the elbow.
- We continue to isolate students who develop symptoms at school, instruct on isolation guidelines for those that test positive for COVID-19 and contact trace/quarantine those that are close contacts to positive cases. Quarantine procedures will be either a 10 day quarantine or a 7 day quarantine with a negative COVID-19 test that occurs on or after the 5th day since exposure.
- Vaccinated individuals that have surpassed 14 days since their last dose of vaccine will not be quarantined unless they are experiencing symptoms.
- Enhanced cleaning procedures will continue in all settings.

On-going planning aside from this document may be found on the district's website and Facebook page.
